Hopping Across Australia

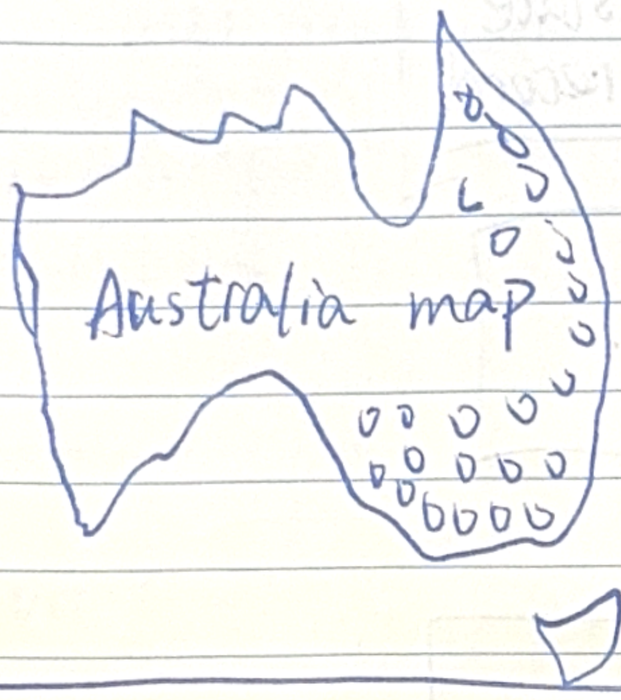
Subtitle.

image

Section 1. Where Do they Live.

Intro

where are kangaroos and wallabies recorded?



SPECIES

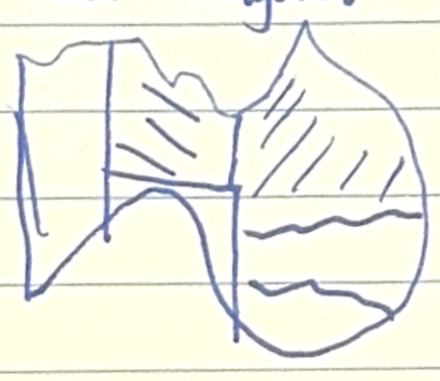
species V

legend

Key take away

Six species, six different state-level footprints.

Red kangaroo



Eastern kangaroo

Western Grey kangaroo

Common Wallaroo

Swamp Wallaby

Red-necked Wallaby

legend.

Eastern species concentrate in NSW

...

South Aus tells a different story.

...

One national map hides regional identities.

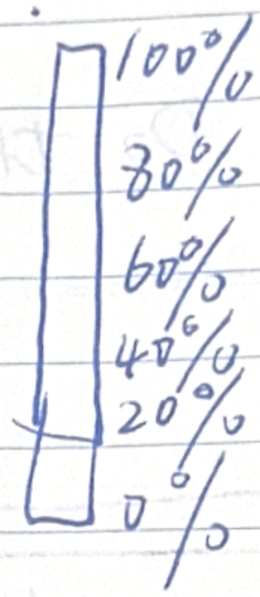
...

Section 2 – Different States, Different Species.

Intro ...

Which species stand out in each state?

NSW
VIC
QLD
WA
SA
TAS
ACT
NT



Share of state record

Real-k E-G-k W-G-k G-W S-W R-n-W.

...

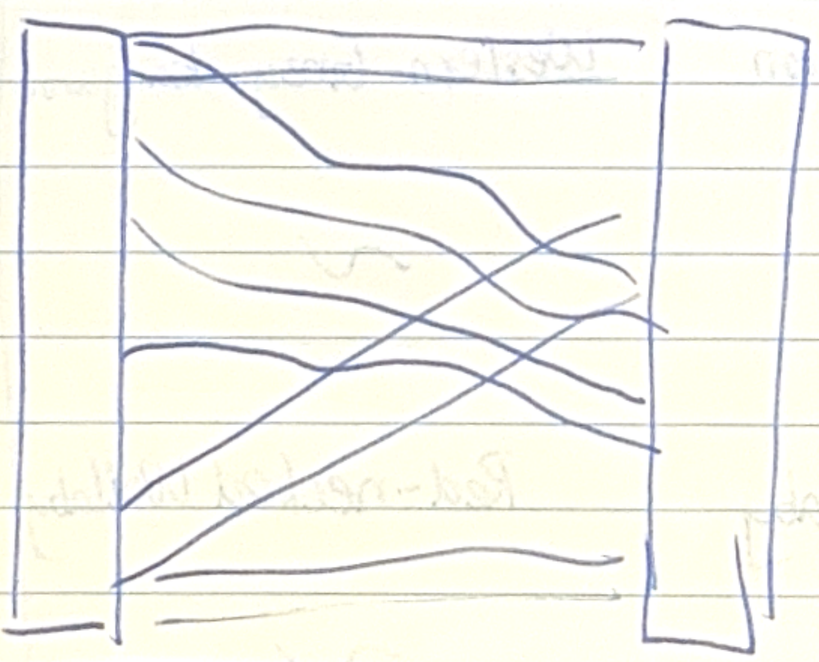
which species characterise each state?

Intro

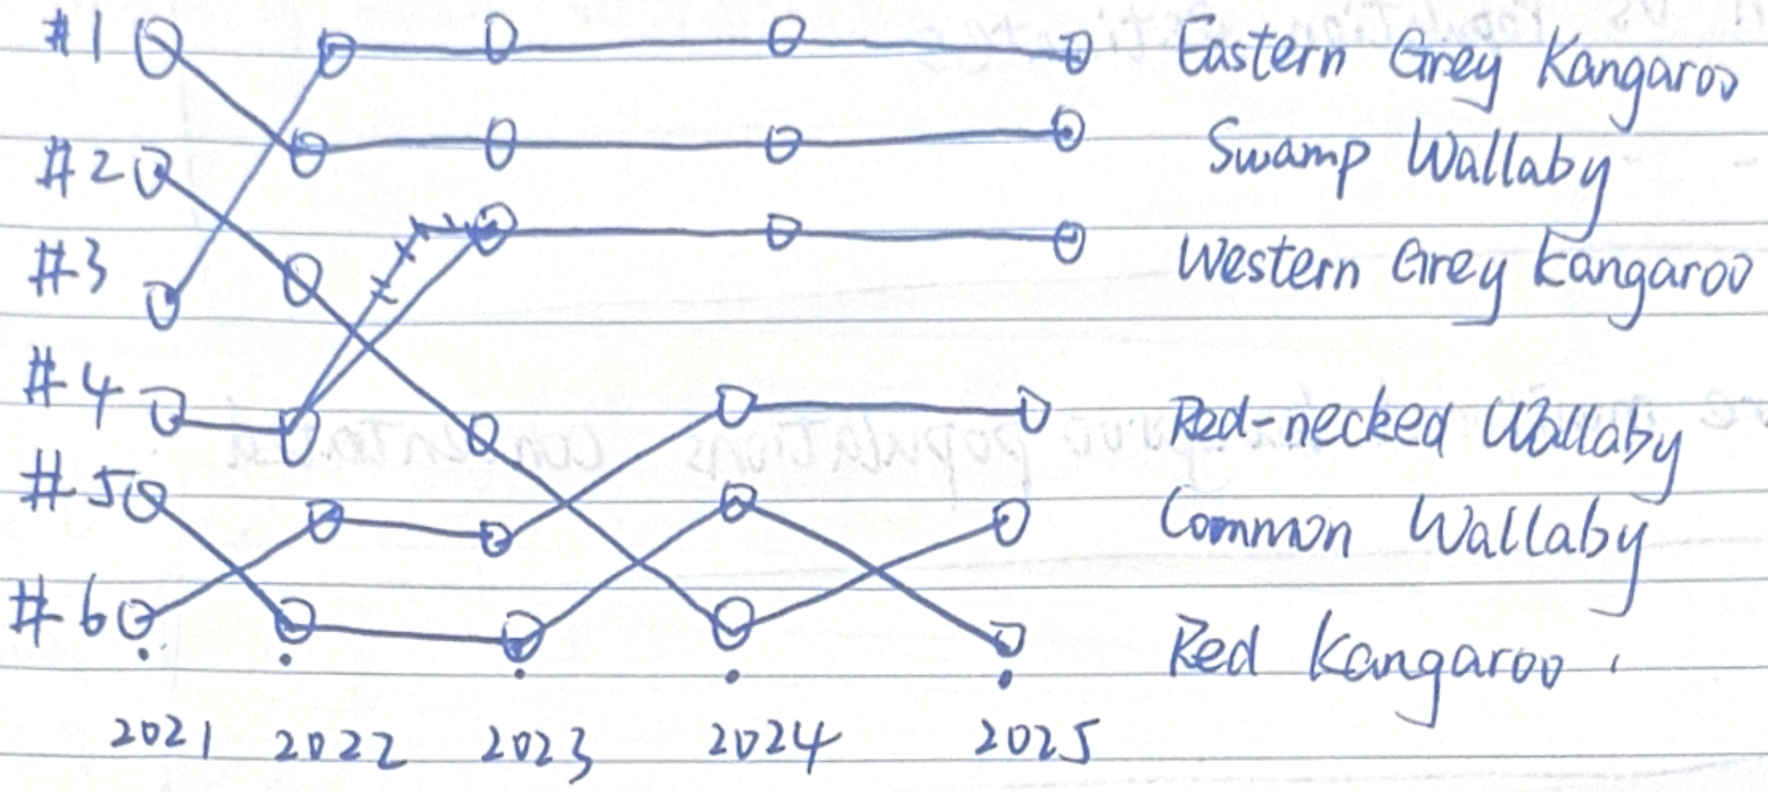
state



Sankey chart

Which species have risen or fallen in the national ranking?

Intro . . .



Commow Wallaby falls back

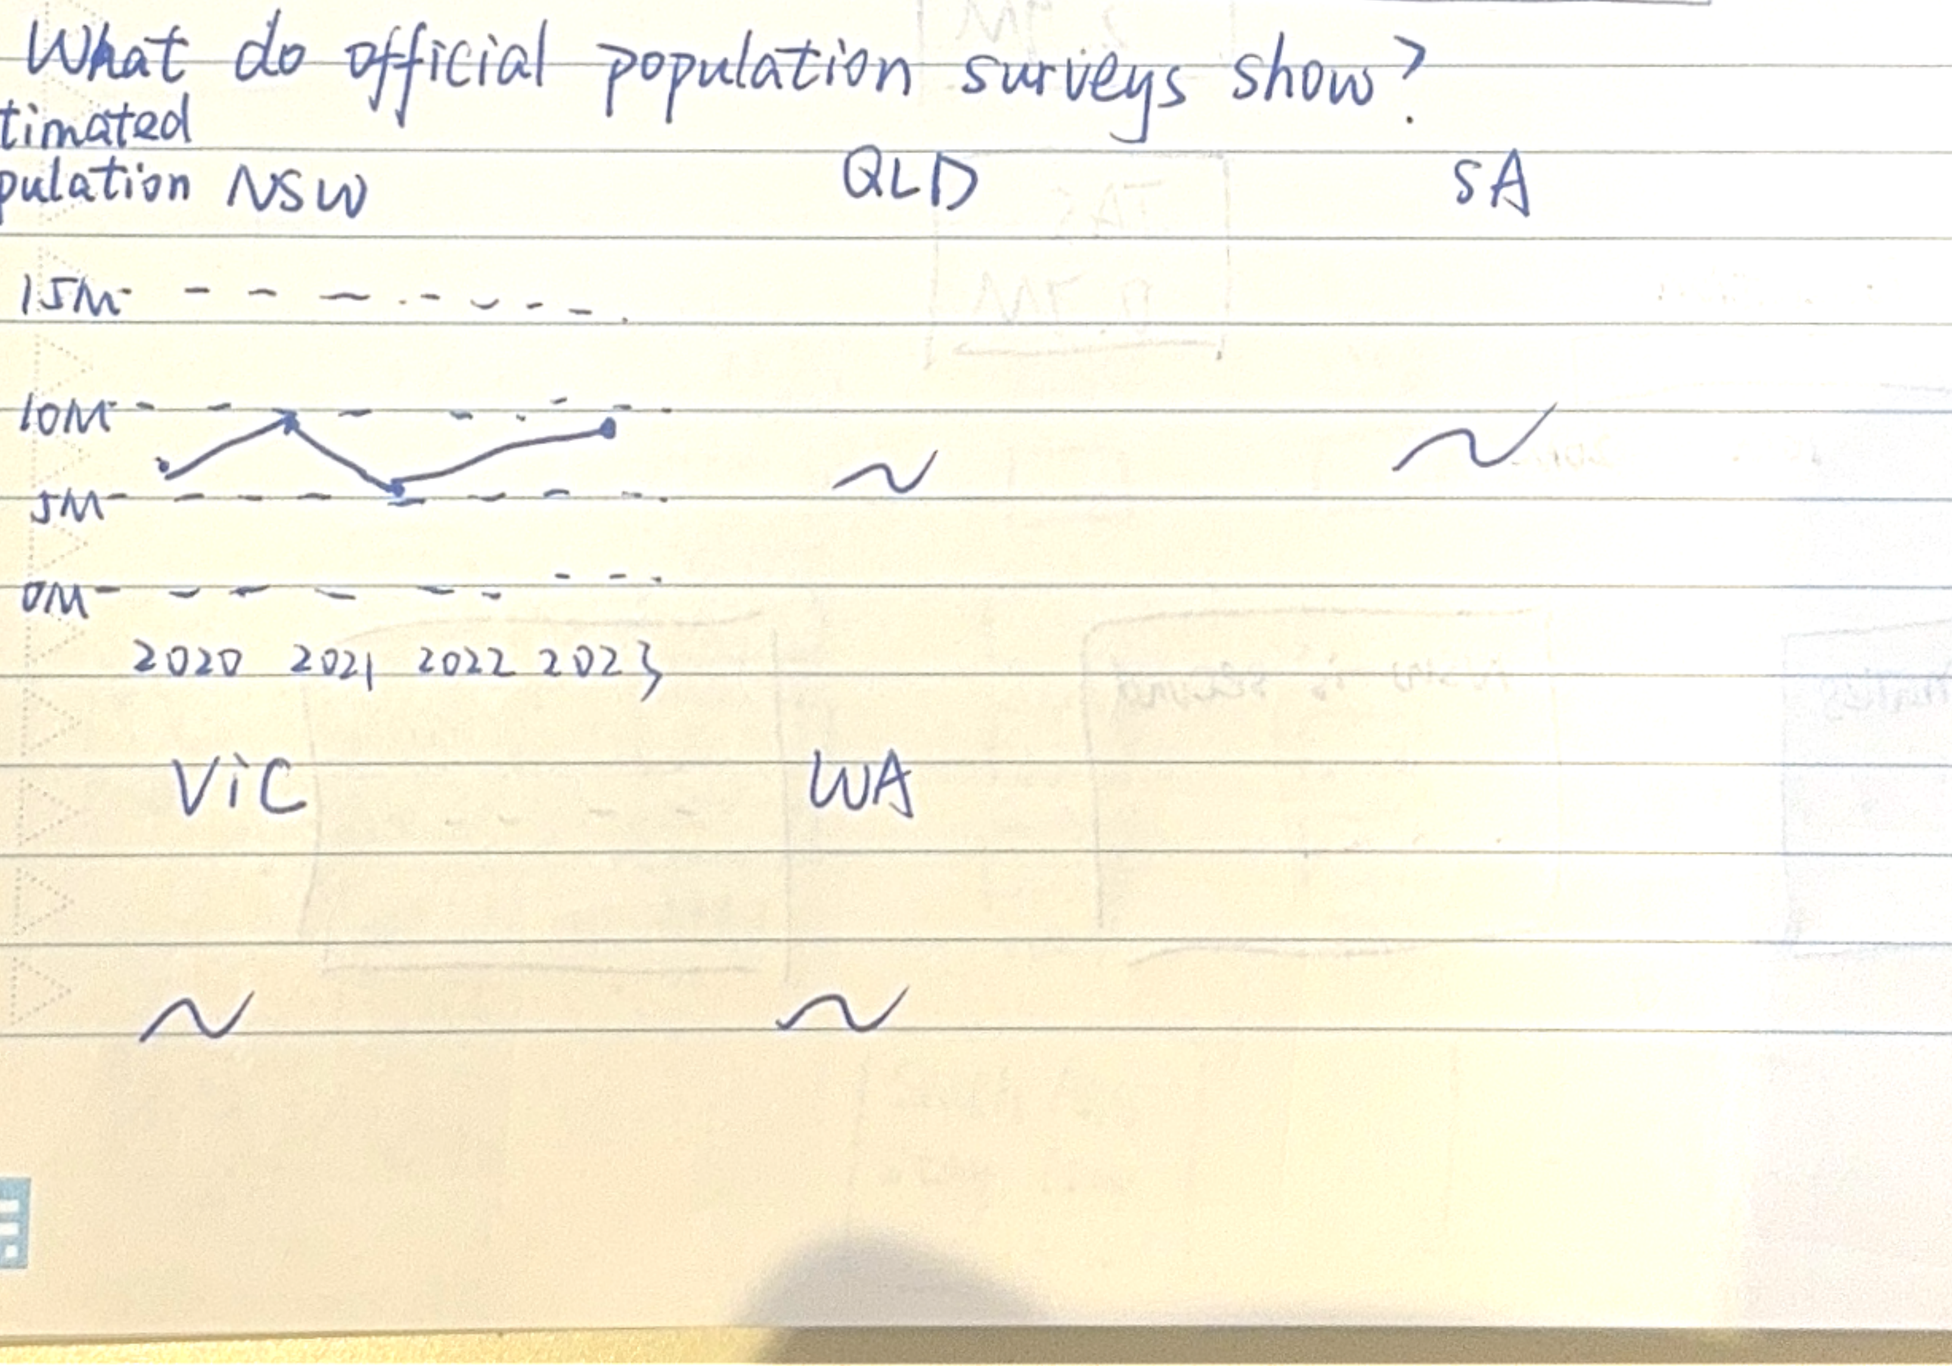
. . . .

. . .

Section 3 - From Observations to Population

Intro

What do official population surveys show?



QLD rises strongly

...

...

Observation vs Population estimates

...

Where are monitored kangaroo populations concentrated?

Intro

NT
2.7M

QLD
10.7M

WA
5.7M

SA
3.2M

NSW
9.6M

ACT
0.3M

VIC
2.9M

TAS
0.7M

Monitored Population

0M 5M 10M 20M

QLD dominates

...

NSW is second

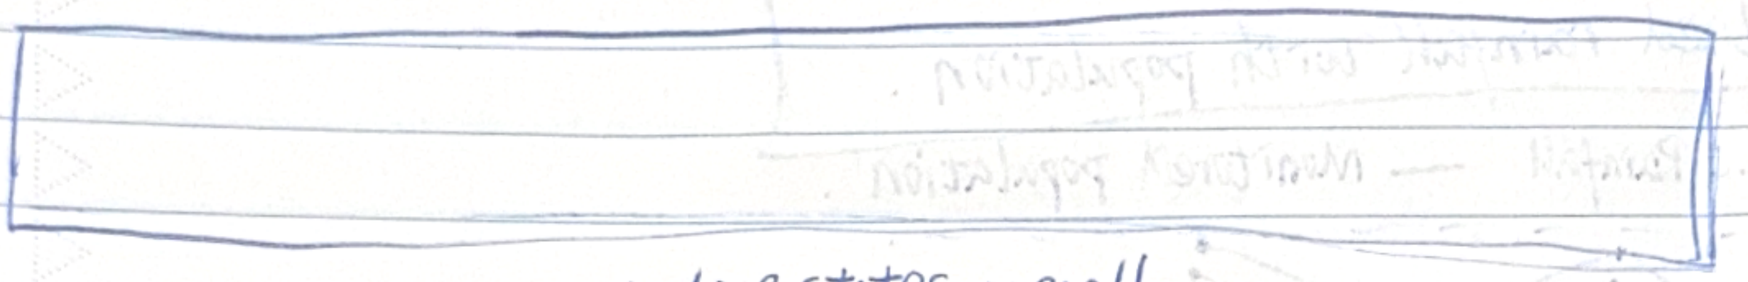
...

...

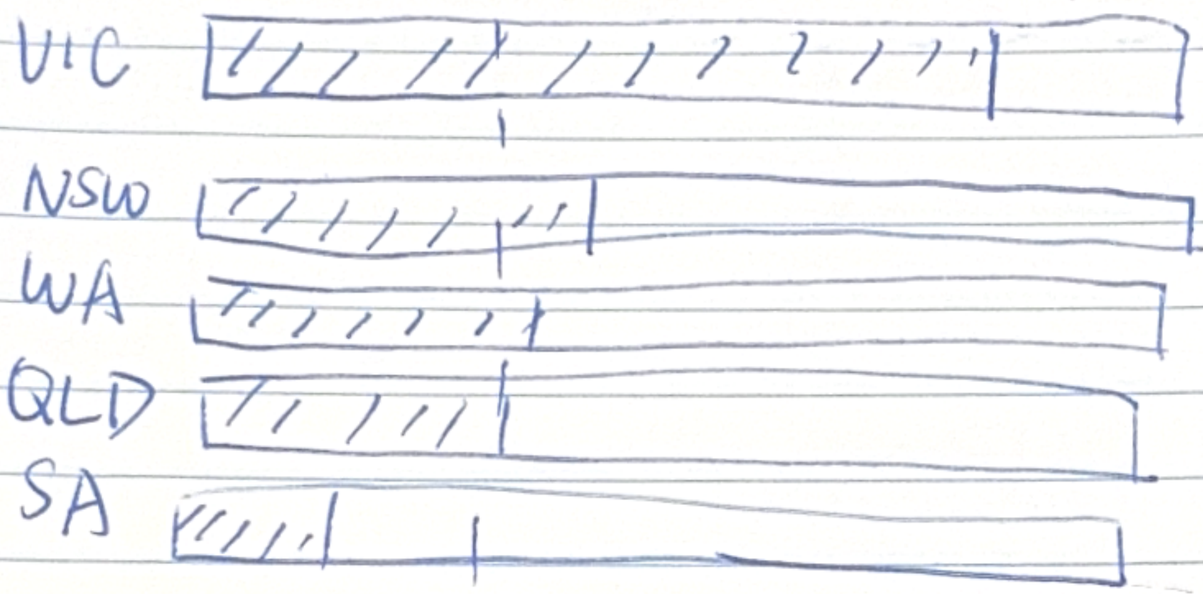
Section 4 - From Population to Management.

Intro.

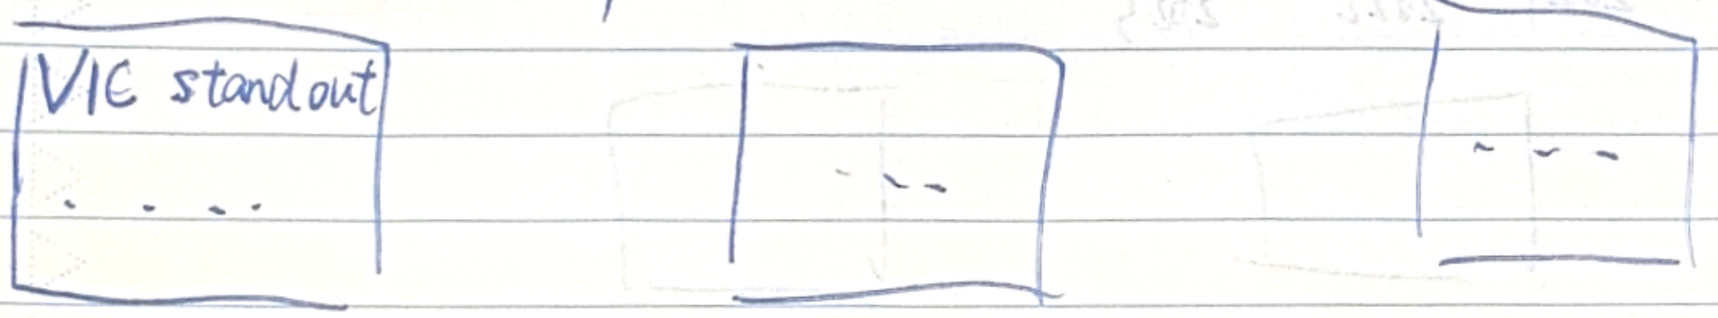
How much of each sustainable quota was harvested?



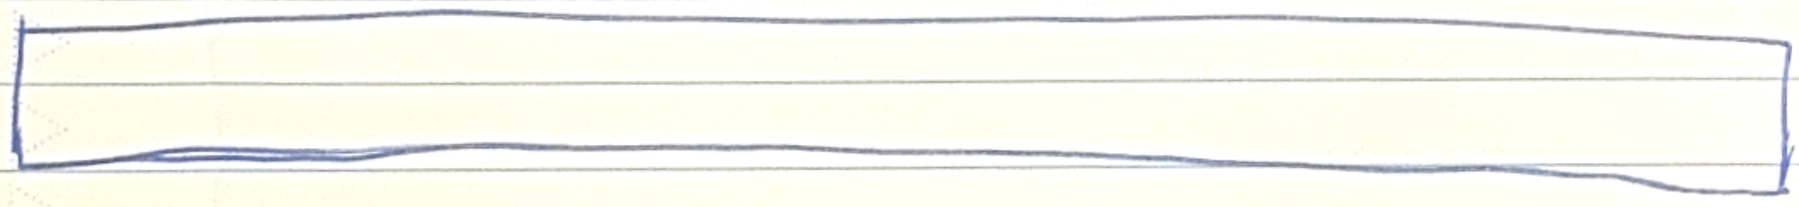
↓ five states overall

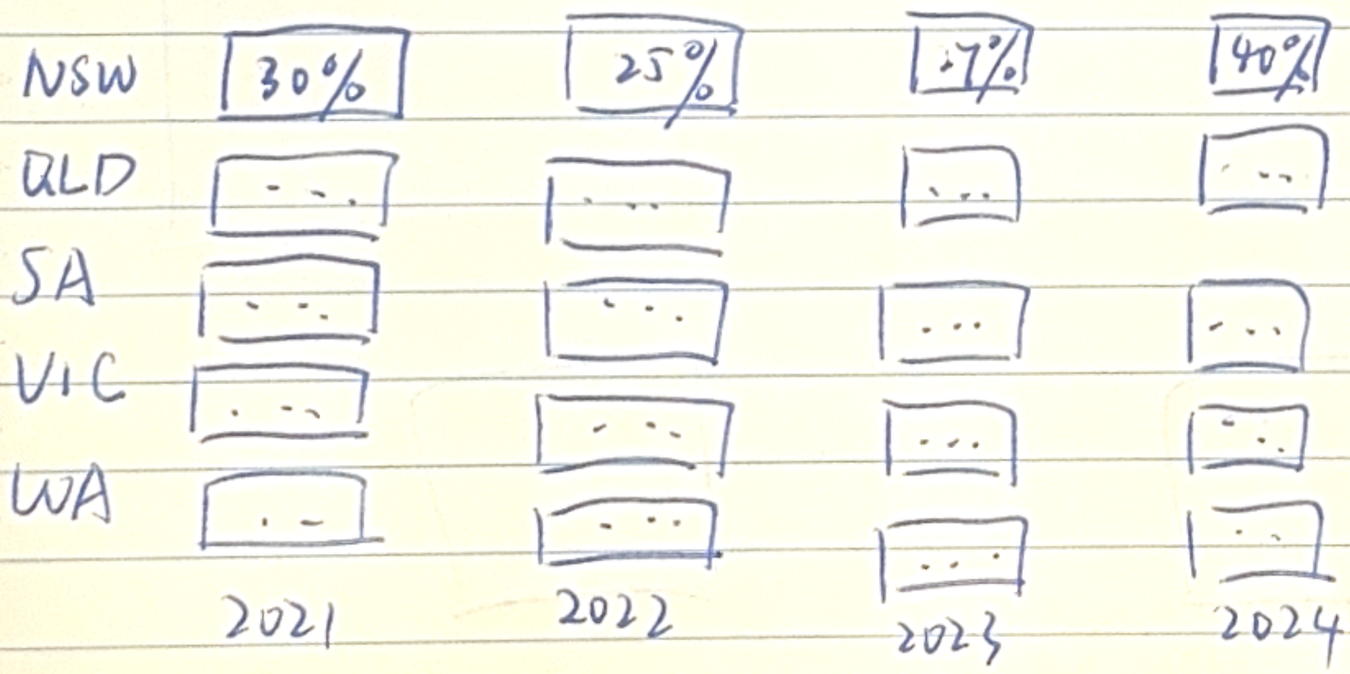


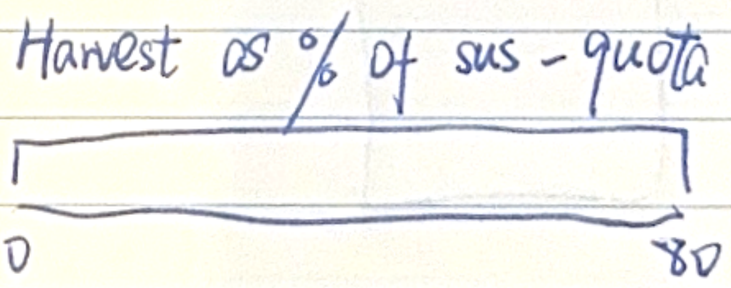
↓



How consistently do states use their sustainable quotas?







NSW remain higest

South Aus stay low

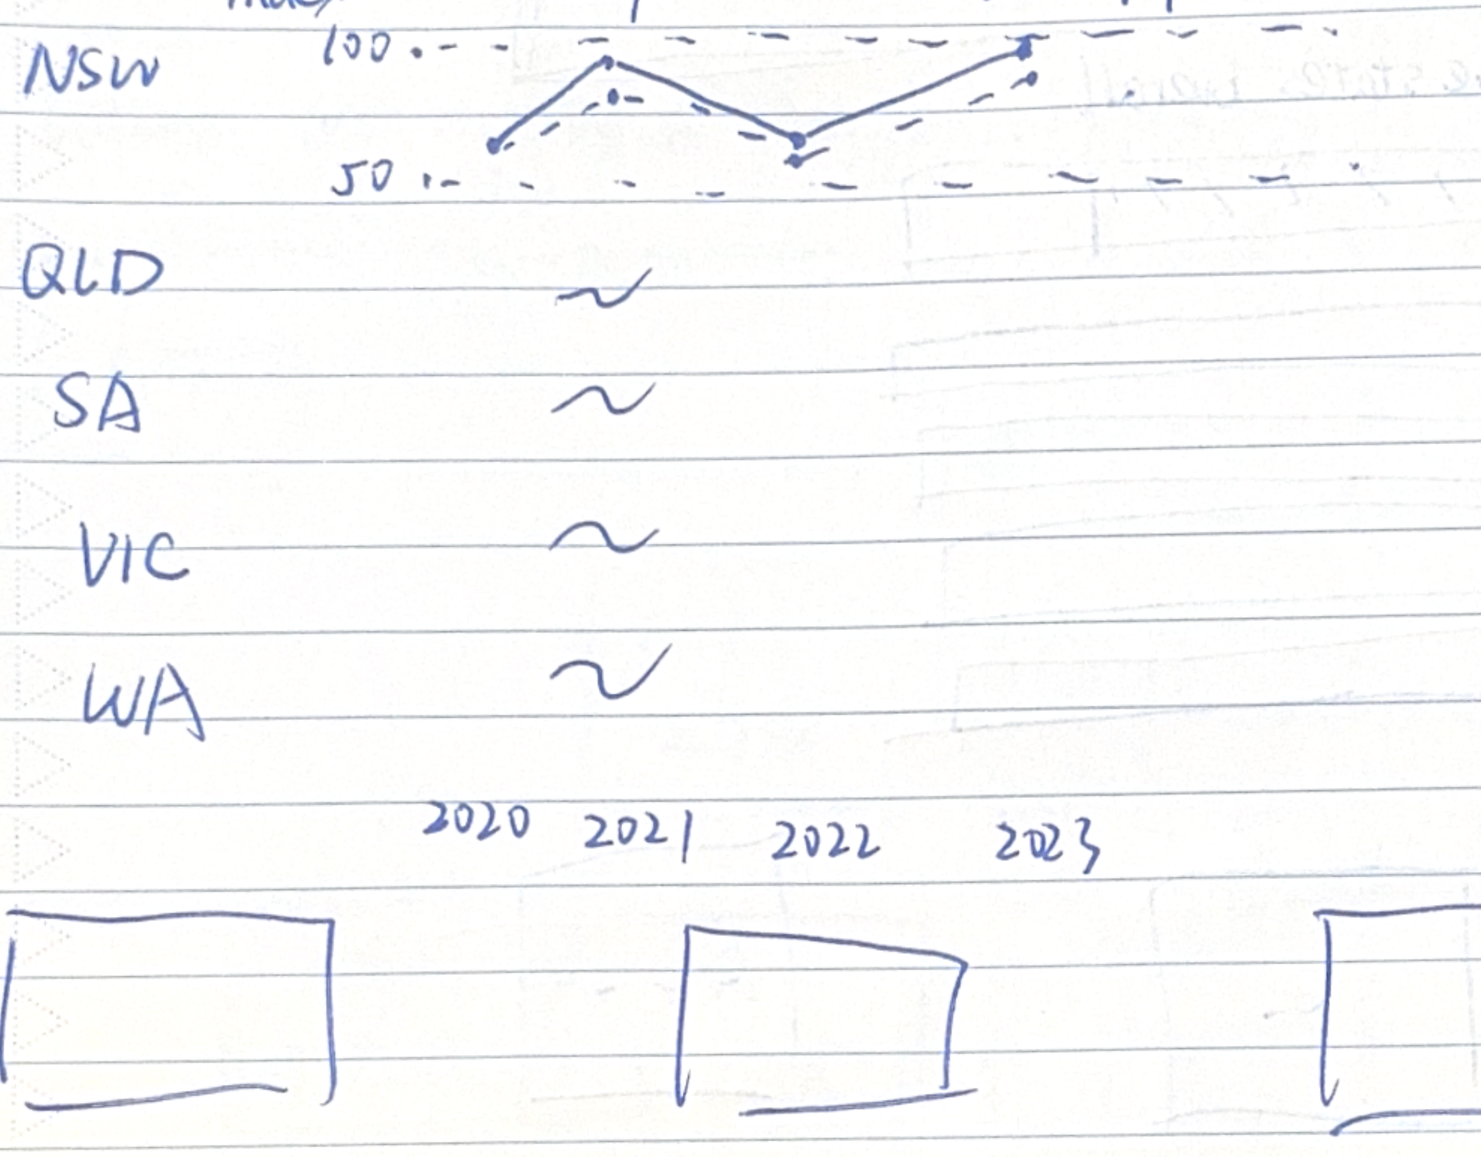
Section 5 - Rainfall and Population.

Intro ...

Do population changes move with rainfall?

use index normalised rainfall with population.

index --- Rainfall — Monitored population.



Section 6 — Population.
